REDUCED MAINTENANCE
COSTS

ADOMANI's all-electric Low-Top Cargo Van is a reliable, purpose-built vehicle capable of taking on last-mile logistics to meet and efficiently achieve your company's goal. Combined with exceptional power and battery durability, this green fleet vehicle provides greatly reduced costs on maintenance and fuel.

Our innovative fleets are built from the ground up as electric vehicles, not to be confused with converted vehicles that must replace existing combustible engines. These pure electric vehicles offer a capable handling experience with exceptional maneuverability, efficiency, and most importantly a clean work environment.

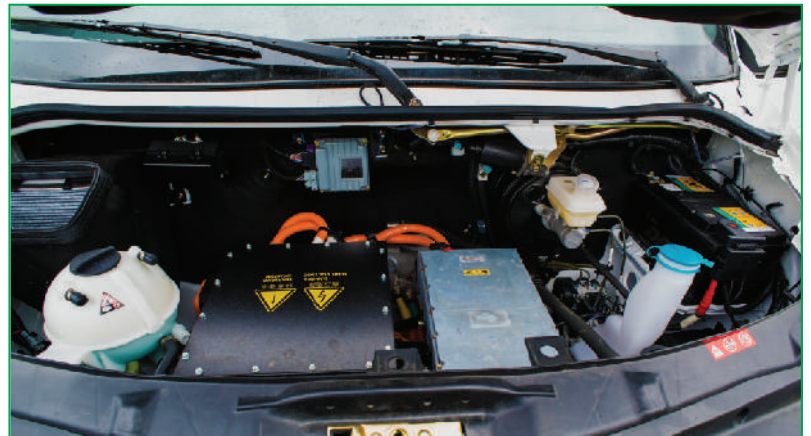

THE ADOMANI SOLUTION

Partnering with us gives you access to a passionate and dedicated team of experts with the true belief that delivering quality ZEV solutions is the pathway to cleaner air, reduced dependency on fossil-fueled vehicles, and a lower total cost of vehicle ownership for businesses.

We work closely with our partners, providing EV education while helping them find viable ZEV solutions that work best for their specific needs.

Begin your journey, *Powered by ADOMANI.*

*Zero cost for fossil fuel. Electrical costs apply based on regional utility company charges.
